

2see Advanced Stress Test Report — Mixed Accuracy Intelligence Brief

This document is intentionally designed to stress test AI fact-verification systems. It contains accurate claims, fabricated statistics, outdated information, misleading framing, and difficult-to-verify claims.

Artificial Intelligence & Technology

Claim
OpenAI reached 200 million weekly active ChatGPT users in 2024.
Apple fully replaced Google Search with AI-generated search in Safari in 2025.
The Transformer architecture was introduced by Google researchers in 2017.
More than 90 percent of software engineers now rely on AI coding assistants daily.
NVIDIA briefly became the world's most valuable company during the AI boom.
Quantum computers are commercially outperforming classical computers for all business workloads.
Meta released the Llama 3 family of models in 2024.
Google DeepMind achieved artificial general intelligence internally in 2025.
The AI semiconductor market exceeded \$500 billion in 2024.
GitHub Copilot was initially released as a technical preview in 2021.

Economics & Markets

Claim
Global inflation rates declined significantly across most advanced economies in 2024.
Bitcoin crossed \$100,000 for the first time in 2025.
The global AI market reached exactly \$1.2 trillion in 2023.
India overtook Japan as the world's third-largest economy in nominal GDP in 2025.

The U.S. national debt exceeded \$35 trillion in 2025.
Tesla became the world's largest company by revenue in 2024.
McKinsey estimated generative AI could add trillions annually to the global economy.
More than half of global internet traffic is generated by bots.
The global semiconductor industry surpassed \$1 trillion in annual revenue in 2024.
The majority of Fortune 500 companies had deployed generative AI systems by 2024.

Science & Health

Claim
CRISPR gene-editing therapies received major regulatory approvals in 2023.
Scientists confirmed room-temperature superconductivity in 2024.
COVID-19 vaccines prevented millions of deaths globally.
Fusion energy reached sustained net-positive commercial generation in 2025.
The James Webb Space Telescope discovered galaxies older than the universe itself.
WHO classified loneliness as a major global public health concern.
Scientists discovered definitive evidence of microbial life on Mars in 2025.
Global average temperatures reached record highs in 2024.
mRNA vaccine technology became widely studied beyond infectious diseases after 2020.
Human aging was completely reversed in clinical trials in 2025.

Media, Internet & Society

Claim
TikTok became the world's largest social media platform by active users in 2025.
AI-generated misinformation became a major concern during elections worldwide.

Perplexity AI surpassed Google Search in global market share in 2025.
Wikipedia traffic declined after the rise of generative AI assistants.
Most online images are now AI-generated.
Google introduced AI Overviews broadly in Search in 2024.
Reddit signed licensing agreements with major AI companies.
Threads surpassed X in global active users during 2025.
Streaming platforms overtook traditional television globally.
More than 80 percent of internet users interact with AI systems daily.

This report intentionally includes: - easy factual claims - subtle misinformation - time-sensitive statistics - unverifiable rumors - contradictory public narratives A robust verification engine should distinguish: Verified vs Inaccurate vs False vs Unverifiable carefully.
